HAVE YOU TICKED PART 2 AND CHOSEN FROM EITHER CREDALAST CLASSIC OR CREDALAST VELVET MADE TO MEASURE?

See overleaf for choice

The Manufacturer cannot be held responsible for incorrect measurements Remember to complete ALL circumference and length measurements shown for the style required. All measurements should be taken on the bare leg with the patient standing and after the leg has been rested and swelling is at a minimum i.e. early morning. Give exact measurements in CENTIMETRES making sure that the tape is not pulled tight around the leg. It is perfectly normal to find that the measurements vary between left and right limbs.

Credalast® and Credalast Velvet® are registered trade marks. Tactel® is a registered trade mark of Invista.

ACTIVA[®]
HEALTHCARE

Credalast Velvet or Credalast Classic Made To Measure Stockings?

Remember to tick the box for your choice overleaf.

Why change to Credalast Velvet Made To Measure stockings?

The new Credalast Velvet Stockings are the most advanced Made To Measure prescription stockings available and the first prescription stockings to include Climate Effect technology.

Developed by the Credenhill/Activa Healthcare Partnership as the leading Made To Measure Stocking supplier, the Velvet stocking represents another innovative leap forward in providing many benefits to the patient.

Developed from premium Swiss stocking manufacturing capability with high technology yarns, the Credalast Velvet offers:

Breathable Fabric

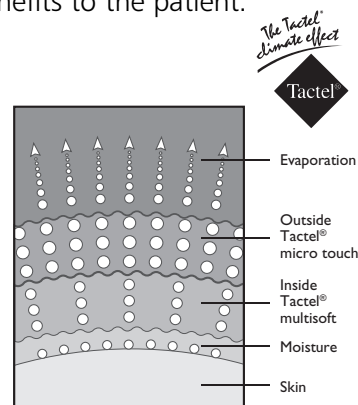

Credalast Velvet is the first prescription Made To Measure Stocking with the Tactel[®] Climate Effect which wicks away moisture and improves air permeability, helping to keep an optimum skin balance regardless of activity.

Ease of wear

We have made it easier for you to put on and wear the stocking through the extremely elastic high stretch yarn.

Comfort and Elegance

The Velvety touch of the High Technology Tactel[®] microfibres offers outstanding comfort and a soft feel as does the reinforced heel and the specially sewn strong flat seams.

Try the Credalast Velvet Made To Measure but do not forget the Credalast Classic.

The Credenhill/Activa Healthcare partnership now offers a choice with two ranges of Made To Measure stockings: Credalast Velvet and Credalast Classic.

We believe Healthcare Professionals and patients will mostly want to convert to the Credalast Velvet as it offers so many benefits compared with existing stockings available.

Thousands of patients have been very happy with the original Credalast Classic Made To Measure stocking, which offers many of the advantages of the Velvet, although it is a more traditional stocking which will continue to suit many patients and is still available.

This is a unique choice that no other supplier can offer you. Please remember to clearly prescribe which of the two ranges of stocking you require overleaf.

What should I prescribe?

When will I receive the Stocking?

Both types of stocking are available on Drug Tariff/FP10. Please state Credalast Velvet or Credalast Classic Made To Measure, compression class, colour, style and quantity for each leg.

Example *Credalast Velvet Made to Measure, Class 2, Natural, open toe, below knee, 2 pairs*

Measure your patient and fill out the form overleaf. At the pharmacy the pharmacist will fax off this form to Credenhill on **0800 028 5206**

The hosiery will then normally arrive **within 5 working days** of Credenhill receiving the form.
